Summary

The PC

There are many different types of computers, but the most common is the personal computer (PC). A PC is a computer that is designed for individual use. It can be used for a variety of tasks, including word processing, web browsing, and playing games. PCs are available in a variety of sizes and prices, and they can be found in many different locations, including stores, libraries, and homes.

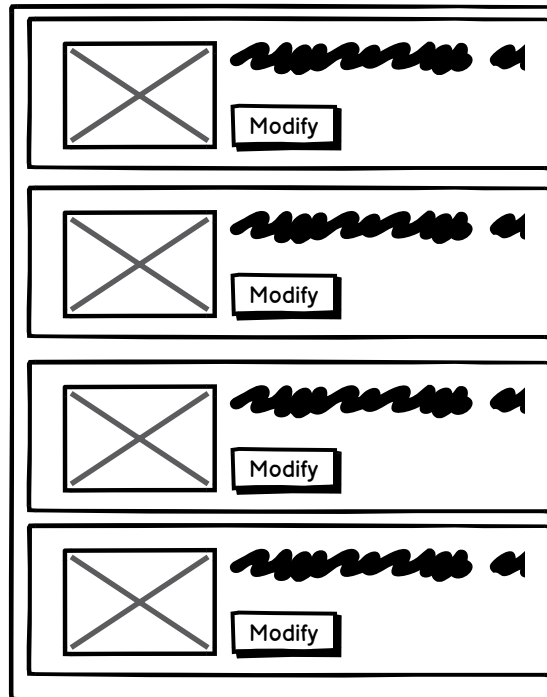

Accessories

There are many different accessories available for PCs, including monitors, keyboards, mice, and speakers. These accessories can be used to enhance the functionality of a PC and make it more comfortable to use. For example, a monitor can be used to view documents and images, a keyboard can be used to enter text, a mouse can be used to click on icons, and speakers can be used to hear sound. Accessories are available for a variety of different PC models, and they can be found in many different locations, including stores, libraries, and homes.
